

Peer-to-Peer printing driver (version 2.0) over TCP/IP or NetBEUI

(a) Windows 2000 issue

The PTP driver is printing well under Windows 2000.

We found a mini problem in installation process which will be hidden on the background at 95% process.

Please type "ALT" + "TAB" to select that task that ask you to look for “Configure Print Server” dialog box.

(b) Windows 95/98/NT/2000's MS_DOS mode printing

The Port Name must be configured as LPT3 or LPT4 when you configure Peer-to-Peer printing driver.
