## VIP-320/VIP-280

Firmware Upgarade Procerdure:

Pleaes download the latest firmware to a PC firset, and browse to the **"Backup/Restore -->
Configurations"** menu, and click on the **"Browse"** icon to select the file, once the firmware file is
entered, please click on the **"Restore"** icon to proceed with the updating process.

After process completed, please click on the **"Reboot"** button below:

After loading the firmware files, it is suggested to load the factory default settings to
activate the new configurations. Please press the RESET button on the rear panel over
8 seconds or until SYS LED begins to flash. When factory reset is completed, the
Default LAN IP is http://192.168.0.1 for factory.

ⓘ Hint

```
-------------------------------------------------------------------------------
Never power off the VoIP router when restoring
machine configuration file or upgrading the
firmware, the machine will be damaged permanently.
