# BASIC OPERATIONS

## While talking with a door station

- Note:** 1. The 5 direction pad operation should make effective with **fish-eye** door station.  
2. The following instructions are based on fish-eye door station.

## Answering a call

1. Touch **TALK/MON** button to answer the call, the LED lights up. To end the call touch **TALK/MON** button again.

# BASIC OPERATIONS

---

2. If wants to see greater detail about visitors,move to the desired position by touching ▲ ▼ ● ◀ ▶ on the screen to view the image in pantilt & zoom mode.

# BASIC OPERATIONS

3. If necessary, during the call touch >> key to display the adjustment icons. Touch the corresponding icons to adjust the parameters.

4. Touch Unlock key or Unlock icon on screen to open the Entrance Panel door lock.

The icon  will be displayed on screen, to indicate that the door lock has been released.

# BASIC OPERATIONS

## Monitoring

It's possible to see the condition of entrance at any time.

1.Touch to display the door stations/cameras in your system.

2.Touch to activate the desired door stations/cameras.

3.The image is displayed for 30s.

\*Touch **TALK/MON** button on panel in standby mode to monitor the master door station in shortcut.

## Video Quad Monitoring:

If the system installs multi cameras via QSW. **Video quad monitoring** is available.

1.Base on the last section,touch“>” icon twice to enter the third page.

2.Touch QSW1 item to activate the monitoring.

3.The four images are displayed at the same time.

Touch one of video to switch to monitor the corresponding camera Independently.

## To end monitoring

Touch “<” icon on the screen, or press **TALK/MON** button on the panel,or press **CLOSE** button on the panel.

\* Monitoring also ends automatically after 30 seconds.

**Note:** During monitoring, images can be viewed, but audio cannot be heard.

During monitoring, manual recording is available.

During monitoring, touch **TALK/MON** button on panel to begin communication with outdoor person.

# BASIC OPERATIONS

## Recording

Videos and images are possible to be recorded, both automatic recording and manual recording are available.

### Automatic recording

- Recording starts after 3 seconds while receiving a call.
- While recording, “ ● ” blinks on the screen.
- Capture one video/image automatically for each calling.

#### Note:

- \* Automatic recording function cannot be cancelled.
- \* Automatic recording is not available while monitoring a door station. To save videos/images while monitoring, see manual recording below.

### Manual recording

While being called, Touch  icon when an image is displayed.

#### Note:

- \* Manual recording is available at any time when  icon is on the screen.
- \* Manual recording is allowed in pantilt & zoom mode.
- \* Manual recording cannot be performed during automatic recording.

\* If a micro SD card is installed, the recording is video, and recording time limited is 10s. The videos will be saved in micro SD card directly. Otherwise, the recording is image. The image is stored in the built-in memory first.

\* A brand new SD card needs to be formatted by the monitor, then it can be used for video recording.

\* If a micro-SD card is installed, images can be copied to SD card.

\* Max. 32G Micro SD card is supported.

# BASIC OPERATIONS

## Calling other monitors(Intercom)

It is available to communicate with another monitor installed in another room of the apartment or with a monitor of another apartment or with a Guard Station.

1.Touch to display the available intercoms.

2.Touch to activate the communication with the desired intercom.

The LED **TALK/MON** lights up to indicate that the call is active.

When the recipient answers the call, communication is started.

3.Touch **TALK/MON** button to end the intercom call.

**Note:** when a call is received from the outdoor station while the indoor monitor is in “intercom” mode, the system follows the priority rules and ends the intercom call.

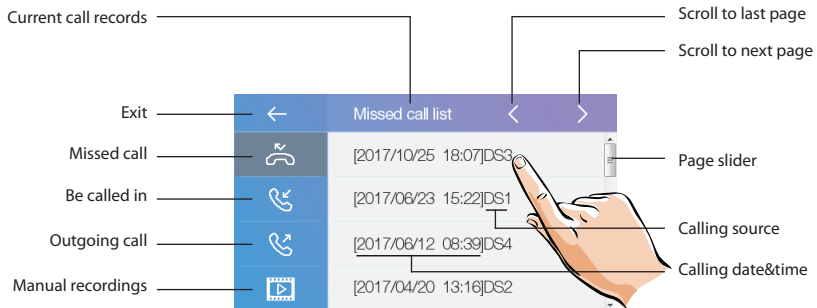

# BASIC OPERATIONS

## Viewing calling records

All calls from door station or other monitors will be recorded and can be reviewed afterwards.

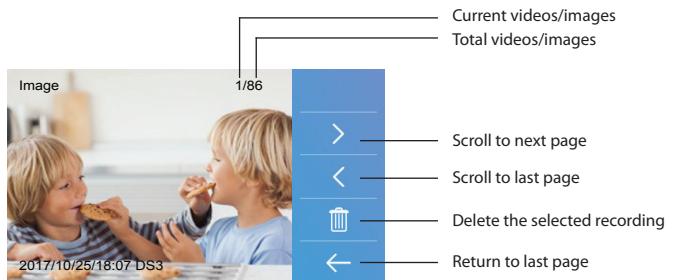

1.Touch to display the available calling records.

2.Touch to see greater details.

\* When the capacity is full,the oldest calling records will be deleted automatically to make room for new records.

# BASIC OPERATIONS

---

## Opening staircase light

**Note:** The staircase light should be connected on the system, and this function should be supported by RLC. Please refer to RLC user instruction in detail.

Touch **[Light]** icon on main menu page, the staircase light will be turned off automatically after 60 seconds.

\*Touch **[Light]** icon again to turn off the light.

## No disturb function

It is available to forbid the calling from outdoor station or other monitors.

1.Touch to display the call scenes.

# BASIC OPERATIONS

---

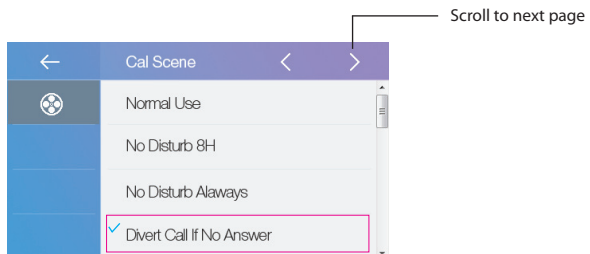

**No Disturb 8H:** The calling from door station or other monitors will be forbidden for 8 hours.

**No Disturb Always:** The calling from door station or other monitors will be forbidden all the time until the function is released.

\* This function will perform immediately if selected, and the status area on main menu page will show "🔇" icon. The LED 🔴 will light up in red.

## Transferring call

The calling from door station can be diverted to your smart phone.

**1. Divert Call If No Answer:** If nobody answers the call in 30s when receives call from door station, diverts the call to the smart phone.

At this mode, the monitor will always open the screen and show image from door station during diverted, if the monitor answers the call at this time, diverted will conclude at once.

**2. Divert Call Always:** When receives call from door station, diverts the call to smart phone directly.

At this mode, the monitor will shut off the screen after diverting successfully, but you can still use it in normal.

\* If divert the call to smart phone via Sip sever, need to choose one.

\* The status area on main menu page will show "📞" icon.
