

Installation of Format Convert V.20 for Record file

Version: 2.0

The installation package includes:

1. The main application: SetupEx.exe
2. ffdshow play plug-ins: ffdshow_rev589_20061126_Q.exe
3. WMEncoder Encoder: WMEncoder9.exe
4. Player Plug-ins 4.9: HikFilters_setup(6.30).exe (Player Plug-ins English version)

Note: If there are ffdshow and WEEncoder on the PC already, installing them again is not allowed.

If there is Player Plug-ins on the PC already, it is recommended that remove the old version and upgrade to newest 4.9 version.

Installation Steps:

1. Install SetupEx.exe, ffdshow_rev589_20061126_Q.exe, WMEncoder9.exe and HikFilters_setup(6.30).exe in order.
2. There is a file named "ASFWriter.ax" under installation Directory after installation.
3. Register filter.
The steps: Start->Run->input "regsvr32 (path) ASFWriter.ax" in the box, e.g. regsvr32 "D:\Program Files\Format Convert\ASFWriter.ax". The Format Convert can be used after succeed prompt.
4. Please refer the help documents for specific functions and usage description.
