Chapter 3

Voice communication samples

There are several ways to make calls to desired destination in VIP-100PT/VIP-150PT. In this section, we'll lead you step by step to establish your first voice communication via keypad and web browsers operations.

Peer to peer (P2P) mode

VIP-100PT to VIP-100PT connection via IP address

Assuming there are two VIP-100PT in the network the IP address are 192.168.0.1, 192.168.0.2

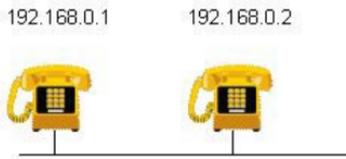

In peer-to-peer mode, you can directly pickup the handset and dial the IP address of the remote VIP-100PT using the keypad as below:

1 9 2 * 1 6 8 * 0 0 0 * 2 #

Then the phone in 192.168.0.2 should ring. You can repeat the same step from the second VIP-100PT for voice calls.

VIP-150PT to VIP-150PT connection via IP address

Assume there are two VIP-150PT in the network, the IP address are 192.168.0.1, 192.168.0.2

In peer-to-peer mode, you can directly pickup the handset and dial the the IP address of remote via calling party keypad as below:

1 9 2 * 1 6 8 * 0 0 0 * 2 #

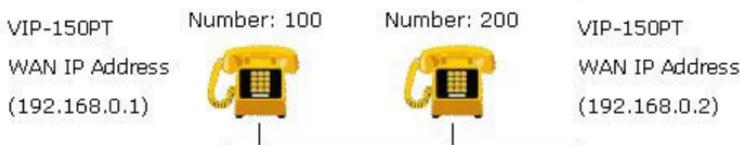

Then the phone in 192.168.0.2 should ring. You can repeat the same steps from the second VIP-150PT for voice calls

Hint

- If the IP address of the remote calling party is known, you may directly make calls via its IP address and end with an # .
- If the IP phones are installed behind a NAT/firewall/ IP sharing device, please make sure the NAT device support SIP applications before making calls

VIP-150PT to VIP-150PT connection via SIP telephone number

STEP 1

Please browse machine SIP configuration menu, and enable the Proxy mode. Insert IP address of the remote calling party in the Proxy Server Address field. Sample configuration screen is shown below:
