

Drawer KVM Console with 17" LCD

The PLANET DKVM-1700 is the drawer KVM with single-rail console design offering industrial level input solution, which optimizes your space utilization by controlling your systems in just 1U space on the rack. The separate rail design helps users install the KVM console more easily. You don't have to prop the heavy console during the installation but just lock the rails into the rack and then pull the KVM console into the rails. With modular design, you can easily integrate different KVM modules to fit your control system. The DKVM-1700 provides the flexibility for users to select which KVM module they need for connection.

With the PS/2 KVM Switch module, you can use PS/2 cable either to control multiple PCs or servers or connect PLANET KVM-800 / KVM-1600 up to 8 tiers. In this chain, you can control up to 128 PCs or servers with the same console. The 8/16-port Combo-Free KVM Switch module is also available to fit to most servers that doesn't support PS/2 interface. With the Combo-Free KVM Switch module, users can use PS/2 or USB type cables to control multiple PCs or servers without any concern.

The KVM switch modules are loaded with rich features, such as one local console port, Daisy chain capability, On Screen Display (OSD) menu, Password security, Searching PC server name, Hot key control, Push button and Auto-Scan control, complete keyboard and mouse emulation for simultaneously PC boot-up processes.
