ADS-2400 IP DSLAM Quick Installation Guide

Thank you for purchasing the ADS-2400 ADSL2/2+ IP DSLAM. Following the Quick Installation Guide, your can quickly deploy this device in several minutes. For getting advanced information, refer to the user manual.

I

The DSLAM can be installed in a standard 19-inch rack, by using the mounting brackets provided. Mount the shelf on the rack using the large screws provided. The procedure to connect and wire the system is as follows.

Rear Panel Connection

The following figure shows the rear panel connection of DSLAM

- Step 1: Ground the DSLAM by connecting a grounded wire
- Step 2: Connect the "Line" connector, a 50-pin centronic connector, of DSLAM to CPE. Each connector supports 24 ports of ADSL/ADSL2/2+ for Data path.
- Step 3: Connect the "Phone" connector, a 50-pin centronic connector, of IPAM-4800/4824 to Exchange/PBX.
 - Note: (1) Patch panel and Telco cables are optional to standard package.
 - (2) The 1st port of each connector comes to pair of pin #25 and pin #50, instead of pair of pin #1 and pin #26

Step 4: Hook power cord and apply the power.

Front Panel Connection

Station

This section shows how to prepare the system to perform basic communication functions through Element Management System (EMS). Perform initial configuration procedures as follows:

- 1. Click the EMS button on the screen of autorun to install EMS into your PC with Windows NT, XP or 2000.
- 2. Before you start to connect to EMS, it is necessary that your PC's IP and DSLAM's IP are in the same group.

Note: Default IP address of Management port is 192.168.200.111

- 3. To enable SNMP for EMS access, one needs to issue commands below to DSLAM by Telnet to management port or connecting to console port (9600, N, 8, 1) and then log in with default username and password of "admin".
 - a. "\$create snmp comm community public rw"
 - b. "\$create snmp host ip 192.168.200. xxx community public", where 192.168.200.xxx is the IP of your PC.
 - c. "\$create snmp traphost ip 192.168.200.xxx community public version v1", where 192.168.200.xxx is the IP of your PC.

 Launch the EMS and then log in with the "Admin" for both user name and password. Click on to enter the EMS system.

Login	
6	Account: Supervisor Password:
	<u>Q</u> K <u>S</u> hutdown

5. Add the IP address of DSLAM into the Agent manager.

Liter	ct Territory	101 <u>-</u>	I emilary M	anager	
Demount:			Mount:		
IP Address	Alias Name	^	IP Address 192.168.100.176	Aliaz Name Taipei 102
