KEYBPTZ4D XtendLan

OPERATING INSTRUCTIONS

Before installing and using the 4-Axis keyboard controller，Please read these instructions carefully and keep them for reference when you need.

Features

1. Intelligent Keyboard mainly used in the field of controlling DVR, matrix, PTZ, receiver or other terminal device.
2. RS485 communication, controlling up to 255 PTZ or 99 DVR.
3. For pan/title or camera control, it supports ZOOM, IRIS, FOCUS, PRESET/TOUR, FUNCTION, PATTEN controlling and parameters setting.
4. For DVR control, it supports PLAY, STOP,RECODER,DISPLAY,UP,DOWN,RIGHT,LEFT,DVR-1,DVR-9/16,DVR-4,SEARCH,ZOOM+,ZOOM-,FEW,FF,REVERSE,PLAY,PAUSE,SEQ,DVR-TV, FREEEZE,CATCH,ALARM and so on.

Applied Project

1. 4-Axes keyboard controller controls different high speed dome or PTZ with PELCO MOLYNX protocol.
2. 4-Axes keyboard controller work on DVR and controls terminal device.

Cautions

Please pay more attention on following items when you install and use it :

1. Installation and using should be operated only by qualified person.
2. When you use it, please make sure if all of accessory are made by our factory.
3. Please make sure the product is working with the right power supply and voltage, and please use the original adapter
4. Do not attempt to repair the keyboard as opening or removing covers may expose dangerous voltage or other hazards.,

5. When you use it, please follow the instruction of the manual and make sure the connection wire, the power supply, baud rate and protocol must be match your control equipment.

Accessory

1.DC9V power   1pc
2.Connection box   2pc
3.Connection wire 2pc
4.Manual   1pc

Parameters

Adapter	AC220V or AC110V
Power Supply	DC9V/5W
In/Communication	RS485
Out/Communication	RS485
Distance	1200m
ID	255/1024(based on different protocol)
LCD	LCD (dot-matrix)
Work Temperature	-10°～50°
Humidity	90%
Size（mm）	390 x145 x 160
Weight（Kg）	2.37

Protocol Support

Terminal device protocol:

PELCOD 、 PELCOP 、 Molynx 、 AD dome 、 SAMSUNG、PANISONIC、N1、N2、N3

Host device protocol:(DVR or matrix）:

Dahua、Hikvision、Dragonet

Baud Rate

2400、4800、9600、19200

Faceplate Introduction

1：Function Key   2：LCD   3:Indicator light   4：4-axis joystick

Function Key：

	▣ ： Indicator light FAR（▣ ►►）： zoom out or display recording in sequence quickly （For DVR） NEAR（◄◄ ▣）：zoom in or FEW recording (For DVR） OPEN（▣ ►II）：Iris open ,menu confirm, play the function of pause or play recording . (For DVR) CLOSE（◄ ▣）：Iris close ,menu exit or replay recording (For DVR)
	0～9：Digital key CAM：shift key of camera MON（▣ DVR ID）：shift key of monitor or the key for confirm DVR ID
	Menu：Enter the camera menu of the camera mode and enter the DVR menu of the DVR mode. Login: Login menu in the mode of DVR Light: The LCD background light function key Enter: Confirm the menu of the DVR mode. Esc: Exit Menu of the DVR mode.

Preset / SERCH ： Call preset (For PTZ) / Search（For DVR）

REC / ● ： Pattern scan(For PTZ) ------Start to play / Record（For DVR）

STOP / ■ ： Pattern scan------Stop scan(For PTZ) / Stop Record（For DVR）

PLAY / ► ： Pattern scan------Recording play –back / play Record（For DVR）

ON / Previous ： Open the AUX switch (For PTZ) / return to previous menu(For DVR）

OFF / Next : Close the AUX switch (For PTZ) / go to next menu（For DVR）

ALARM / ACK ： Alarm function / Auto answer (For DVR)

PTZ / DVR ： The shift key for PTZ and DVR

CLEAR / ZOOM ： Clear key /zoom key (For DVR)

FULL / □ ： DVR-1

MULTI / ⊞ ： Multiple Image (For DVR)

S-Preset / Model ： Set preset

**C-Preset / Freeze** ： Clear preset (For PTZ) / Freeze picture (For DVR)

**TOUR / SEQ** ： Shift SEQ（For DVR）

4 -Axis Joystick

It could control the UP, DOWN, RIGHT, LEFT; ZOOM IN, ZOOM OUT and CAPTURE THE PICTURE .

Connection Port

5：The port for DVR, matrix or host device

6:　The port for PTZ, receiver or other terminal device
7:　The port for power supply

Connection Box

8: Communication port with keyboard

9 and 11: RS485-

10 and 12: RS485+

Operation of Keyboard Controller:

Connection:

The connection with DVR or other host device:

The connection with PTZ or other terminal device:

| PTZ port | box port | RS485 |
| 4D Keyboard | Connection wire | Connection box | Receiver |

Setting:

Self-checking

When power on, the LCD will show the current protocol, baud rate and other information for self-checking as the following:

LCD Introduction

Photo：3.2b

1. The state of current command for CAMERA / DVR / Matrix and etc.
